Date: 17.07.2025

| Product ID       | BZ-660F        | Customer ID | POLAND |  |
|------------------|----------------|-------------|--------|--|
| Item Description | Rubber Stopper |             |        |  |

Use this list to confirm adherence to AQL and safety standards. Confirm that sampling levels comply with customer agreements. This checklist captures quality inspection points and sampling levels. This section details quality requirements and test points for the batch. Check that inspection steps follow the approved procedure. The following table outlines inspection criteria and classification levels.

|    | Inspection Checklist Points   | Inspection<br>Depth | Defect Class |       |       | Notes  |                      |
|----|-------------------------------|---------------------|--------------|-------|-------|--------|----------------------|
| 3  | Design Specs                  |                     | Critical     | Major | Minor | OnHold |                      |
| 1  | Wrong product size            |                     |              |       | V     |        | Needs review         |
| 2  | Carton is damaged or          | Level III           |              | V     |       |        |                      |
|    | markings incorrect            | Lever III           |              | V     |       |        |                      |
| 3  | Package is not sealed         |                     | V            |       |       |        | Critical impact      |
|    | completely                    |                     |              |       |       |        | Critical impact      |
| 4  | Hinges loose                  | Level III           |              |       |       |        | Needs review         |
| 5  | Product doesn't power on      | Level II            | V            |       |       | V      | Critical impact      |
| 6  | Screws loose or missing       |                     |              |       |       |        | Minor issue observed |
| 7  | Incorrect orientation in box  | Level II            | V            |       | V     |        | Needs review         |
| 8  | Shipping mark is illegible or |                     |              |       |       |        |                      |
|    | missing                       |                     |              |       |       |        |                      |
| 9  | Connector not working         |                     |              |       |       |        |                      |
| 10 | Visual defect on housing      |                     | V            |       |       |        |                      |

| AQL Level         | Critical | Major | Minor |
|-------------------|----------|-------|-------|
| Default           | 0        | 2.5   | 4.0   |
| Customer specific |          |       | V     |

Inspection summary is filed for regulatory compliance. Confirm that all sampling results are within acceptable limits. Flag any open issues in the CAPA tracking system. Checklist results have been reported to the quality manager. Corrective actions are scheduled for identified issues. Archive this summary in the audit-readiness folder. Overall quality status indicates compliance with defined AQL levels.
